

## WeAct Tech

WeAct Tech is a registered software company specializing in service-based solutions. Our primary focus is on academic institutions and management software for businesses. Currently, we serve over five clients, including Vellalar College, and we are in the process of onboarding another academic institution to provide them with an advanced assessment portal.

Additionally, we have secured a strategic partnership with a client company, wherein we provide technical support in exchange for equity. We also collaborate with three clients, offering customized website and mobile application development to support their business operations. Furthermore, we are actively working on a new product backed by two investors, ensuring its development aligns with their strategic considerations.

### Key Projects :

Vellalar College & other 2	Assessment Portal
A1 Call Taxi	Booking App
InPharma	Full Technical Support
Capital Share	Website & Mobile Application
Product Development (Investors)	Circuit simulator & Online Recruitment Portal
Client Management	Cold Calling & Client Meetings

- Logith Kumar K R - Developer

# **Kaai Curry**

Kaai Curry is an emerging food startup focused on delivering customized meal plans for diabetic patients. Our mission is to provide tailored nutritional solutions that cater to the specific dietary needs of individuals managing diabetes.

We have pitched this innovative idea to investors and established key connections, with further discussions underway. Our current focus is on refining operational strategies to ensure efficient implementation and scalability of our services.
